

AP Computer Science A

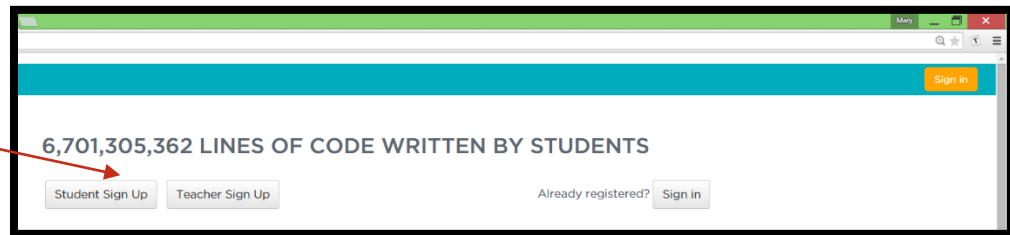

Summer work

As a prerequisite for understanding the basics of computer programming, you will need to complete some online course work. Follow the directions below to access the website.

Go to www.code.org and select the “student” option.

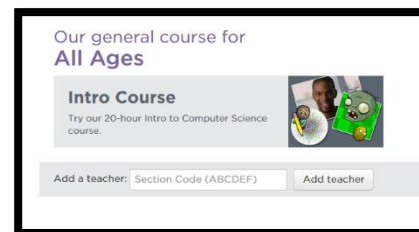

On the next page, select the “Student sign up option”.

Use your first name and last initial as your “display name”. Complete the rest of the sign up information.

On the next page, scroll to the bottom of the page and enter in the Section code “ZMXRWS”. This will take you to the 20 hours of code you need to complete as your summer course work.

This is intended to give you a foundation for the basics of programming. If you feel this is below your programming skills, please come and see me or email me.
