Systems Diagnostics, Service, and Repair

2021 – 2022
COUGAR GARAGE

Automotive Service . . . an exciting, high-tech career that's really going places! As long as there are vehicles on the road, there will be a need for highly-skilled automotive technicians to maintain service and repair them. Today there is a shortage of 60,000 automotive service technicians in the United States. If you like diagnosing and solving problems, and are fascinated with cars and how they work, then a high-tech career in automotive service may be just your speed.

You're in the driver's seat: Whether you decide to be a hands-on technician, a service manager, an automotive service instructor, or own your own shop, both males and females alike have the opportunity to become highly-skilled professionals who make a valuable contribution to society by keeping people on the go. The choice is yours! If you're driven by success, a career in automotive service may be just your speed. Are you going in the right direction?

If you have questions about a high-tech education in automotive service, talk to your counselor about enrolling.

SYSTEM DIAGNOSTICS, SERVICE, AND REPAIR PATHWAY GRADES 9-12

INTRODUCTORY Basic Automotive

One-year course which provides the students with information and activities that stimulate understanding of automobile and the industry.

CONCENTRATOR Automotive 2

The year-long course covers specialty areas of the automobile: engine repair and chassis. Students will review basic engine principles and auto services.

Automotive 3

This year-long course covers two related areas of the automobile: electrical systems and engine performance.

CAPSTONE

Engine Technology (FCSS)

This course gives the student practical hands-on experiences in diagnosing, troubleshooting, and service procedures in the automotive field. This course covers practices of maintenance and repair in automotive specialty areas.

AUTOT 9 - Dual enrollment offered to students (at Fresno City College)

***Project based curriculum for
all pathway classes.***
